Captain Smart

is a series of captivating games, puzzles and toys that support child development through creative play, tailored to address the needs of children from birth to 11 years of age. All the products support the development of key abilities, such as concentration, perceptiveness, memory, creativity and logical thinking.

Captain Smart products help to solve problems experienced by many children on a daily basis, e.g. lack of concentration. They can be a great alternative to computer or smartphone games.

Time spent together playing Captain Smart games strengthens family bonds and develops communicative skills among the family members as well as among friends.

On the boxes of Captain Smart's products, you will find a set of icons depicting the key skills the product develops. The icons allow parents and educators to quickly identify which practical skills the child can gain while playing with the chosen product.

Develops:

Our company is based in Warsaw, Poland. We offer over 100 titles for children. Captain Smart products have been awarded with the main Polish toy awards. Professional toy reviewers, educators and parents unanimously agree that Captain Smart provides both fun and educational play experience while keeping the child safe.
